-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This application was withdrawn from issue on 9/28/05 due to the unpatentability of one or more claims. An action on the merits is found herebelow:

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The independent claims are inconsistent with the definition found in the specification for the "fish tape receiving chamber". The specification defines the fish tape receiving chamber as being between walls 28 and 34 (Figure 9) as set forth on page 9. The belt is defined as being in guideway 36 which is outside of the "fish tape receiving chamber". Yet, claim 1 states that web 48 connected to the belt extends "into the fish tape receiving chamber" and that claim 4 recites that the belt is "within the fish tape receiving chamber". Neither the belt or the web extend below wall 34 according to the drawing and the specification. Hence neither the web or the belt is within the fish tape chamber (between walls 28 and 34) as defined in the specification and the claims are misdescriptive and inconstant with the specification.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Gardner (3,582,044).

Gardner teaches a fish tape housing having walls 26 (figs 2 and 3), a handle 31, a groove (between elements 30 and 32, as shown in fig. 3) and a continuous, generally circular belt (28 and 30 together, as shown in fig. 1). Gardner discloses that the "strip 28 may be attached directly to the ends of the fins 30 ... by sonic welding or other known means (col. 4, lines 11-14). When the strip is attached to the fins 30, a continuous generally circular belt is formed.
